

## COMBIFIX<sup>®</sup> 8022

Sheet-fed offset fount concentrate for conventional dampening systems

### 8022 19

for water with a bicarbonate content  
**up to 250 mg/l**

### 8022 39

for water with a bicarbonate content  
**above 250 mg/l**

### Application

COMBIFIX is designed for conventional fount application systems (molleton or other textile sleeved rollers), usually found in smaller format sheet-fed offset presses.

### Special properties

- Specific adjustment of surface tension
- Formation of a stable film of fount solution
- Good protection of printing plates
- Corrosion-certified according to the latest standard
- Adjusts the pH at 5.0 - 5.3

### Quantity to be added

The recommended concentration for use is 4 %.

### Special versions

#### COMBIFIX 8039 09

For printing with metallic inks. Sets the pH-value to a range between 5.8 and 6.2, in order to avoid negative influence on metallic gloss due to acidic corrosion of the metal pigments in the ink.

### Labelling

Safety data sheet available on request.

### How supplied

10-kg plastic containers  
220-kg plastic drums
